After importing you will find that the characters on the examples doesn't have the outline, so to fix this you need to add two new layers (something like: Outlined-Opaque and OutlinedVC-Opaque) then aplly this layer for the characters on the examples :

Then, add Render Features to your URP settings like this one here :

You could find the outline materials used here in "YSA Toon/Examples/Outline Materials".

This should fix it, Hope this helps you.
